

STAY SAFE ON FOOT AROUND FORKLIFTS

10 WAYS YOU CAN KEEP YOURSELF AND OTHERS SAFE:

❌ Never walk or work beneath loads on raised forks

❌ Never allow yourself to be lifted on a pallet or on the forks

❌ Never try to steady a load that is slipping off the forks

❌ Never take a lift on a forklift or climb on it to stop it tipping

✅ Always keep a safe distance from a working forklift (note the height and width of the load)

✅ Make sure a forklift has stopped before you approach... and always do so from the side

✅ Where available wear hi-vis clothing

✅ Wherever possible use segregated walkways

⚠️ Take care entering aisles, going round corner and through doorways etc

✅ Help keep walking areas clear and clean up spills, broken pallets, plastic wrap etc
